

Team Neutrino

July

4th of July Parade

Our team put our robot on a wagon and walked in Ames' 4th of July parade.

This year was Ames' sesquicentennial anniversary (150th), and so the turnout was huge!

Story County Fair

Since we are a 4-H team, we hosted two of the buildings at the fair this year. Our team was able to talk to a few people about FIRST and FRC.

STEAM Demo

We presented our robot to a local summer school program for elementary kids. They were super excited to play catch with the robot! 😊

Emerson Sponsor Visit

To thank Emerson for their support to our team this season, we drove to Marshalltown and demonstrated our robot to their company.

Solar Car Challenge

The American Solar Challenge stopped at Hilton Coliseum this year, and Team Neutrino had a booth where we demonstrated our robot to the public. Congratulations to Team PrISUm of ISU for winning the best mechanical design award and placing third overall!

Coming Next Month: Team Neutrino will demo their robot at the Science Center's family night and also with team #4646 ASAP at the Iowa State Fair.
