

Team Neutrino

October/November

Cow Town Throwdown

Team Neutrino competed in CTTD for our 3rd time. We were chosen by the 8th seed to be on their alliance, and we ended up being semifinalists! We were successful in reaching our goal of familiarizing the new members with what a competition feels like.

Mentoring local FLL teams

Several of our team members had the pleasure of mentoring the four Ames Middle School FLL teams this fall. We assisted the students in several areas such as NXT programming. Because of our help, the teams are more prepared to compete than previous years.

Safety Animation

This year, a few of our members are working hard to create a safety animation to submit in the annual FRC competition. The deadline is coming up soon, and we will post our animation on our website when it is complete.

FLL Kit building

We met at Sukup Hall to put together FLL kits that will be used at various Iowa FLL tournaments next month. At the end of our build session, we had put about 8 kits together! Good luck to all the FLL teams at your competitions this year – we hope to see you at the state tournament!

Coming Next Month: We will volunteer at the AMS FLL scrimmage and SCI's FLL regional.
