

Team Neutrino

August

SCI Robotics Day

On August 1st the Science Center of Iowa hosted a Robotics Day and invited us to do some demonstrations and presentations. We ran our 2014 robot in the main atrium and had an outreach booth nearby. This was a great way to educate the community in STEM.

FLL Tryouts

We helped administer the Ames Middle School FLL tryouts again this year. Team members will continue to mentor these FLL teams throughout the year, utilizing a great opportunity to reach out and spread the FIRST message.

The Iowa State Fair

With 100,000 people attending the Iowa State Fair, Team Neutrino was invited to attend the fair's STEM day. We set up a successful booth and spoke to many fairgoers about the team, including the Lt. Governor. We also presented to the STEM advisory council and learned about future STEM events, which the team looks forward to attending.
