

Team Neutrino

Cow Town Throwdown

Qualification Rounds

Upon arriving at CowTown Throwdown, we quickly set up our pit and prepared for the qualification rounds. We introduced multiple new drivers in our eight qualification matches, and our team worked hard to keep our robot in peak condition.

Alliance Selection

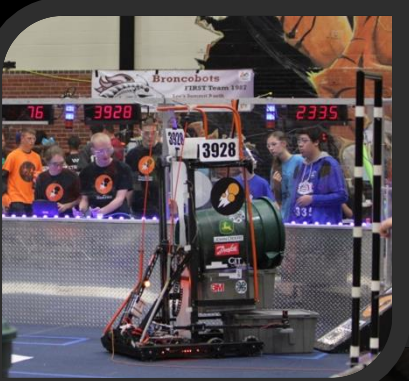

We happily concluded the rounds in 15th overall, and were picked by the second alliance, joining 525 Swartdogs, 3284 4-H LASER, and 5006 Apophis.

Playoffs

Finally the playoff matches came. We got to play in the quarterfinals and had fun cheering on our team. Our alliance performed exceptionally, and we ultimately won the competition!

New-Trinos

CowTown functioned as a great learning experience for our new members. These "New-Trinos" got to practice working in the pit, scouting, and even driving the robot!
