

# Team Neutrino

## December

### Emerson Visit

This month, we visited Emerson Process Management to thank them for their support. They enjoyed seeing the robot in action and hearing about how our season went.

### FLL Scrimmage

This is our fifth year being involved with the Ames Middle School FIRST Lego League scrimmage. Since AMS has a new coach this year, Team Neutrino members planned and ran the event. All four teams got valuable practice for their competition the next day. We also presented about our robot and encouraged the 8<sup>th</sup> graders to join the team next year!

### Marshalltown Regional

The four AMS teams and the St. Cecelia's team competed at the Marshalltown regional on December 5<sup>th</sup>. Team Neutrino members

mentored the teams at the competition and volunteered as well.

### Des Moines Regional

The two Edwards Elementary teams competed at the Sciece Center of Iowa's regional on December 12<sup>th</sup>. Team Neutrino members gave them valuable guidance, as this was their first time competing. We also had several volunteers.
