

Team Neutrino

Newsletter Week #5

Mechanical

The parts Quality Manufacturing laser cut for us came this week, so we were able to start assembling! Thank you, Quality, for all your support!

New Mascot!

For the first time ever, Team Neutrino has a mascot currently dubbed "Neutrino Man!"

Programming

The code for all mechanisms and controls is done. Next week, most of the programmers will get the chance to join another sub-team.

Electrical

We wired both the practice bot and the real robot this week. It was so cool to finally see them drive around!

Girls in Science Festival

Four of our female team members went down to Des Moines on Saturday to show girls that they can really shine in STEM. We used Snap Circuits to demonstrate how to make a circuit to light a bulb, run a motor, or play music, and we explained how we use circuits on our robot.

JOHN DEERE

QUALITY
MANUFACTURING

2015

Coming Next Week: On Saturday, we'll be travelling to Cedar Falls for 525's Iowa FRC scrimmage!
