

# Team Neutrino

## Newsletter Week #3

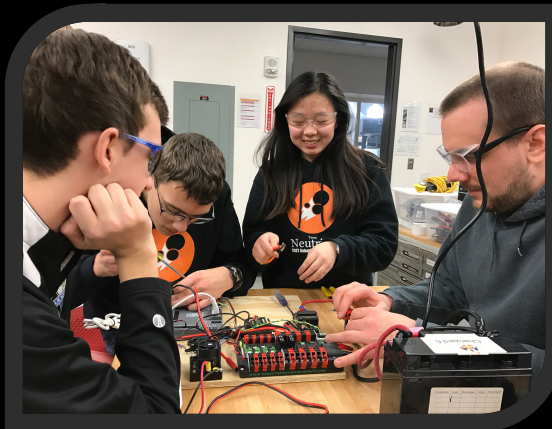

### Programming

Programming team has been very hard at work this past week. They completed code for the drive train, shooter, intake, and gear manipulator.

### Electrical

The electrical team has been working closely with the programming team this week. They expanded on the test board to include motors for programmers to test code on.

### Mechanical

Progress has been made on the practice robot. The Mechanical team has been working in the Boyd Lab on machining parts for the drive base.

### Chairman's

Chairman's essay is making great progress. The Chairman's team has decided the theme, have made rough drafts and the executive summary and are now working on writing the essay!

**Coming Next Week:** Finishing up Chairman's and hopefully getting Quality sheet metal!
