

Team Neutrino

North Star Regional

Qualification Matches

Our qualification matches at the Minnesota North Star Regional were very exciting, and the robot performed exceptionally! We won 7 out of our 8 matches which ranked us 2nd out of 60 teams!

Playoff Matches

As alliance captain of the 2nd seeded alliance we had the privilege of choosing our own alliance for the playoff matches. In the alliance selection we chose team 2883 F.R.E.D. and 2472 The Centurions. We were eliminated in the Semifinal tie-breaker match.

Safety

Our team was notified during the second day of competition that we were a finalist for the Safety award! This meant that we were 1 of three teams nominated for this award. This means our team has one of the top safety programs at the competition.

Awards

It was a very tense awards ceremony. Our team sat in anticipation, and when the chairman's award was announced it was very emotional! The chairman's award won our team our first blue banner and a seat in the world championships in St. Louis, Missouri which we will be competing in from April 26-29. Congrats especially to the Chairman's team for this extraordinary achievement!
