

Team Neutrino

September-October

WiSE STEMfest

Team Neutrino took part in the WiSE (Women in Science and Engineering) STEMfest at Iowa State, where they showed off the robot and talked about FIRST programs with visitors while encouraging females in STEM.

QUALITY
MANUFACTURING

2017

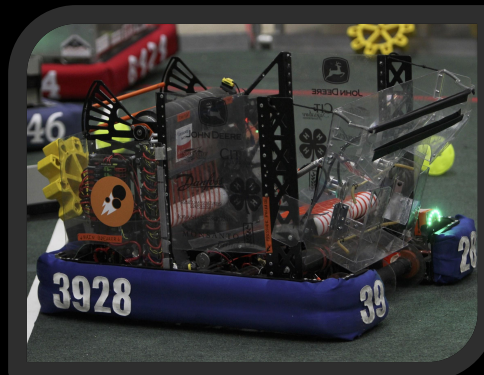

Minibot & EMCC

Over the summer, the team designed a mini robot and worked with Quality Manufacturing to build it. They then took their "minibot" to the EMCC competition in Woodbury, Minnesota, where it caught a lot of attention from other teams!

Battery Plugs

Team Neutrino has been working with the Iowa State Society of Manufacturing Engineers to design a battery plug injection mold. The battery plugs are intended to mark our charged batteries and to give away at competitions.

CTTD

The team had a fabulous time at Cowtown Throwdown, an offseason competition in Lee's Summit, Missouri. They finished ranked 24th with a 4-4-0 record and were picked by the second seeded alliance, finishing as quarterfinalists.

Coming Next Time: **Mentoring and Mock Kickoff!**
