

# Team Neutrino

## Newsletter Issue #6

### Bumper Party

Members spent an entire day working on three different sets of robot bumpers for eight full hours. Lots of music, pool noodles, and duct tape was involved!

### Scrimmage

Neutrinos attended the annual Iowa FRC Scrimmage hosted by FRC #525. Team members worked through the day testing and modifying prototypes and were successfully able to deliver Power Cubes to the scale, switch, and human player.

### Robot Reveal

Team Neutrino officially unveiled their robot and presented it to the community for the first time this week during Robot Reveal. At the event, Team Neutrino's Dean's List and Woodie Flowers nominees were also announced.

### Bag Day

Neutrinos finished up some last minute touch-ups on the robot before bagging it and putting it away until competitions. In the process, members bonded through staying up late and sharing a Chili dinner with one another!
