

Team Neutrino

May-June

Welcoming NEWtrinos

This summer, Neutrino is recruiting new members from different high schools in Story County. NEWtrinos attend training camps and learn skills such as CAD, graphics, and mechanical. They also participate in outreach and sponsor events to learn more about the team.

CAD & Programming Camps

Team Neutrino had CAD and Programming Camps where new and returning members got the chance to learn new skills. In CAD they learned how to use Solidworks to design robots, and in Programming they learned the basics of Java.

Super Summer

Team Neutrino lead three different camps in a local Super Summer program including Mini Makers, where kids did a variety of STEM activities, Engineering .101, where kids took different things apart and saw how they worked. and LEGO Mindstorms where kids got to program LEGO robots.

Electrical Camp

Team Neutrino held an Electrical Camp for new and returning members of the team, where students learned about the functions of the different robot components and how to wire the robot.
