

Team Neutrino

Seven Rivers Regional

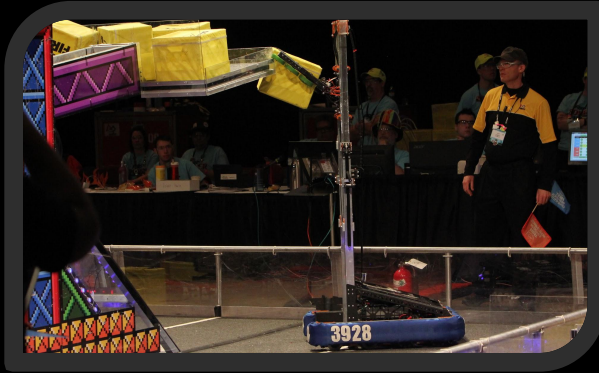

Chairman's

Team Neutrino presented for the Chairman's award at the Seven River Regional! We also attended a Chairman's Exchange (hosted by the Seven Rivers Robotics Coalition) where we gave other teams tips and helped them with their presentation.

Autonomous

Team Neutrino worked to make our two cube auto successful. After some testing, we were able to deliver two cubes to the switch or scale.

Robot

Team Neutrino had a successful set of initial matches, but then luck wasn't on our side. We ended up ranked 35th and picked by 5th seed alliance. The drive team got better practice driving the robot more quickly and effectively!

Meeting Don Bossi

Team members had the opportunity to meet FIRST President Don Bossi and speak with him when he stopped by our pit. He was impressed by our knowledge and professionalism!
