

Team Neutrino

Week 2

CAD

The CAD team has finished the design for the drive train. We have the design for the robot's climber and are now figuring out the math so it will be able to pull itself up. We are also working on the Cargo and Panel manipulators.

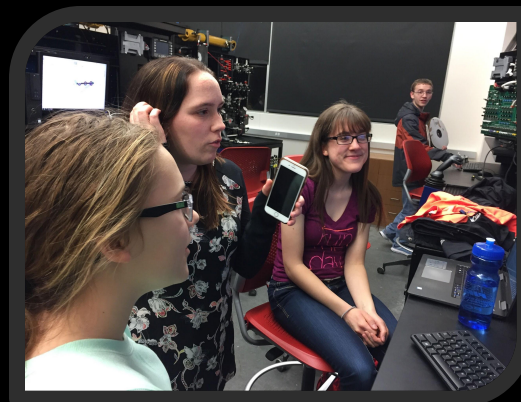

Chairman's

Chairman's award team has moved to the second draft of the essay and are improving it so flows nicely and are updating all of the statistics. We are going through the executive summary and improving the work and making it more precise. We are also starting to plan out the video.

Graphics

The graphics subteam has been improving the Neutrino website so it looks more appealing and so it is easier to use. They have also finalised the T-shirts for this year. (Yay!) Some of the members have been updating the team's Instagram daily.
