

Team Neutrino

Week 3

Iowa FLL State Championships

Saturday and Sunday the 19th & 20th three of the Ames FLL teams and their mentors went to the State championship held here at ISU, and a few of the other members of Neutrino spent those days volunteering for the event.

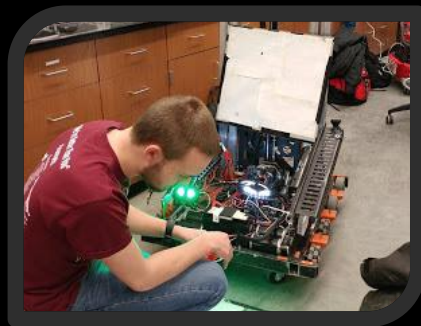

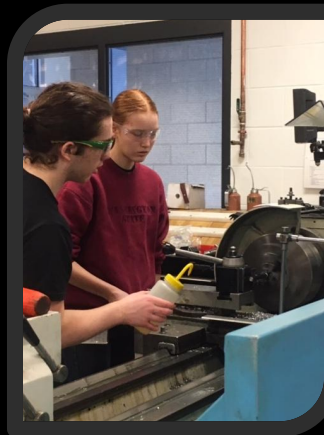

Programming

We got an LED controller working! Then we continued to work on the lidar and worked on driving assist code.

Manufacturing

In the last week we have been finalizing the design and began manufacturing the robot. In Boyd lab we have been manufacturing parts on the lathe and mill for the drivetrain as well as the other mechanisms.

Monsanto & 4-H Visit

On Thursday, January 24th during our team meeting we were fortunate enough to be visited by representatives from Monsanto and the new Story County 4-H Youth Coordinator, Jess Soderstrum.

Scouting

Scouters made a pit form and are still working on updating Scoutmasters for this year's game.

Graphics

The graphics subteam has been very busy this week with planning the Chairman's video and refacing the Neutrino website. They have also been doing interviews for the sponsor thank-you video.

Coming Next Time: We are going to be assembling the drive train!
