

Team Neutrino

Iowa Regional

Qualification Matches

Team Neutrino's robot competed well in the qualification matches; we were rarely defeated, and stayed in the top five. Our climber was very unique, quick, and successful.

Playoff Matches

During the playoffs we ended up ranking third out of 49 teams. By the end, we learned the strengths and weaknesses of our robot and what we will improve on. Our team was honored to win the Quality Award for our robot.

Chairman's

Team Neutrino hosted a Chairman's Exchange for teams to provide feedback for each other. We had "judges" asking questions and teams gave each other constructive criticism on their presentations. At our next regional we hope to win this award!

Scouting

The scouting team created a new system that was more accurate. We now have an app that supplies a QR code so the information can transfer to a database quickly. Thank you to team 612 for posting this scouting app online!
