

Team Neutrino

Seven Rivers Regional

Team Interactions

Members of the team built relationships with other teams at Seven Rivers. Two of our members helped team 7596 with robot repairs, and we ate dinner with Sir Lancer Bots 2977. The Chairman's Exchange led to new friendships with other Chairman's teams. Here's us with Geoff from 1306!

Robot Performance

Our drive team performed very well, ranking 16th out of 54 teams and making it all the way to the Quarterfinals with our alliance partners 171 and 2081.

Scouting

The scouting team updated our procedure for scouting defensive teams, and continued work with team 612's app. This regional, one of our freshmen, Matthew, took on the role of Team Neutrino's representative in Alliance Selection.

Engineering Inspiration

The team won the Engineering Inspiration Award (sponsored by NASA), a prestigious award given to the team that advances appreciation for engineering in their community. This award qualified the team for the World Championships in Detroit!

Coming Next Time: Team Neutrino will be competing at the World Championships in Detroit!
