

TEAM NEUTRINO

Iowa Regional 2023

Robot Game

During our robot games our robot and drive-team performed exceptionally. Our team achieved a successful record of 7 wins and 3 losses, resulting in a final ranking of 14th and earning us a spot as the second member of the 5th ranked alliance. During the elimination rounds, we progressed to round 3 with a record of 1 victory and 2 defeats.

Impact Exchange

Team Neutrino's Impact team hosted the annual Iowa Regional Impact Exchange (formerly called the Chairman's Exchange). This allowed us to give our team, along with others, the opportunity to present to people with fresh new perspectives and gain feedback on what we need to improve on before presenting the next day. This enabled us to form new meaningful relationships with other teams.

Dean's List Finalist

Team Neutrino is proud to announce that Becky Murphy was selected to be one of just two Dean's List Finalists at the Iowa Regional. The Dean's list Award recognizes students with outstanding leadership and dedication to FIRST. Becky will have the opportunity to compete for the Dean's List Award at FIRST World Championship that will be held in Houston in April.

Engineering Inspiration Award

Our team won the Engineering Inspiration Award. This award is given to teams that demonstrate outstanding success in advancing respect and appreciation for engineering within their community. This award qualifies a team for Champs, but because our team was already prequalified, it gave rookie team 9092 from Ogden, Iowa the opportunity to go to Champs!
