

# TEAM NEUTRINO

## September - October 2023 Newsletter

### CowTown ThrowDown

On October 27th and 28th, Team Neutrino attended CowTown ThrowDown in Lee's Summit, Missouri! During this offseason competition, our drive team applied skills acquired at drive practices, new drivers were put up to the test, and the team gained experience for upcoming competitions. We had a great time working with our alliance partners, 2557, 1908, and 5801, and we were able to advance to the semi-finals!

### Des Moines Mini Maker Faire

On September 4th, Team Neutrino members returned to the Science Center of Iowa (SCI) another year for a fun day of volunteering! At SCI, members were assigned to either volunteer at other stations or to demonstrate the Team Neutrino robot. Local kids were able to learn about FIRST opportunities through conversations with our team members. In total, Team Neutrino managed to reach over 900 people at the fair.

### Display Case

During the spring, Team Neutrino had the amazing opportunity to have a display case in the basement of Sukup Hall! After some long planning and delaying, the Graphics Subteam has finally completed this project. You can locate the display on the west wall of the basement (near the vending machines). Inside, there is a large array of team memorabilia and branding.

### Team Bonding

Over the past 2 months, Team Neutrino kicked off the season by hosting two different team bonding events. The first event was located at Spinning Wheels Skating Rink in Ogden, where team members had a great time skating around and getting to know each other. The second event took place at Perfect Games, and it provided a great bonding experience for both new and old members alike.
