

Team Neutrino

November - December

Cowtown Throwdown

What a great way to finish the Deep Space season—Team Neutrino captained an alliance to victory for the first time! We are very grateful to our alliance members, team 323, 1802, and 5119, and our worthy competitors, team 6424, 4522, 3792, and 9999. To see a play by play, visit our twitter and instagram, @frcneutrino.

ISU Research Park

For the second year in a row, Team Neutrino hosted an open house for ISU research park companies. We demonstrated our robot and recruited new sponsors and professional mentors. Visitors were able to interact with team members and learn about FIRST and FRC from students with first-hand experience. We had a great time and hope to be back next year!

Month of Cardboard

On three Sundays of December at the Ames Public Library, patrons had the opportunity to build with cardboard and MakeDo™ kits. Themes were provided each day, including space, winter holiday, and cityscape. For the grand finale, patrons worked together alongside team members to build a massive walk-through structure!

FLL Competitions

Team Neutrino hosted the Ames FLL scrimmage to help prepare ten local FLL teams for competition and volunteered for the Webster City Regional. Congratulations to the four Neutrino-mentored FLL teams advancing to the state championship!
