

TEAM NEUTRINO

Iowa Regional 2025

Robot Performance!

After 9 qualification matches, Team Neutrino was ranked 11th going into alliance selection! We were selected as the 1st pick on the 6th alliance by team 9576 and also worked alongside 2nd pick 1785. Our alliance competed together to make it to semifinals, ranking us 3rd place overall in terms of robot performance!

Impact Exchange

At the Iowa Regional, Team Neutrino continued the tradition of hosting a yearly Impact Award exchange. There, we invited 35 people from other teams to share their presentations and exchange advice and feedback to aid each other in the Impact submission process in the future!

Dean's List and Sustainability Award

Recognized for their outstanding commitment to FIRST and contributions to Team Neutrino, junior team members Chetas and Sarah were awarded the Dean's List Finalist award! As finalists, they'll represent the team and compete for this award at the FIRST Championship later this month in Houston. Additionally, Team Neutrino was recognized with the Sustainability Award!

Scouting and Spaghetti Award

Our scouting subteam worked hard to develop and improve upon a quantitative scouting app this past season, which was used to collect data to strategize around robot performance at the Iowa Regional. Additionally, scouts in the mechanical pits collected qualitative data and awarded team #525 our team's Spaghetti Award!
