

Team Neutrino

June

Offseason

Now that the build and competition seasons are over, we get to focus more on spreading the message of FIRST and STEM awareness through several outreach events.

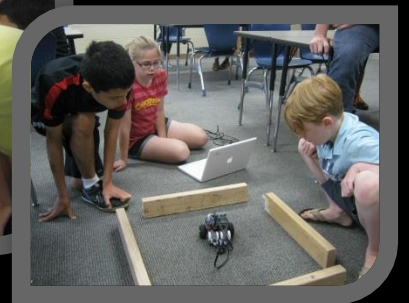

City of Ames visit

To thank the wonderful support of the City of Ames Electric Company, we took our robot to their office and gave a short presentation and demonstration. It was great to be able to let them know how much their support means to our team!

Super Summer

A few members of our team worked with a local teacher to put together a class at Ames Middle School. In the class, students learned the basics of the NXT robot, which prepared them for participation in FLL.

FTC demo

This year was FTC #7491 The Honey Badgers' rookie season. Our team demonstrated this year's robot to them and talked about FTC.

Next month: We will be at the Story County fair and the Solar Car Challenge!
