

Team Neutrino

September

SCI's Mini Maker Fair

The Science Center of Iowa had its second annual Mini Maker Fair! Organizations from around the state came to provide hands-on demos to spread awareness of the maker movement. Robotics teams present included FRC #3928, FRC #4646, FTC #5126, FTC #7714, and the ISU Lunabotics Club.

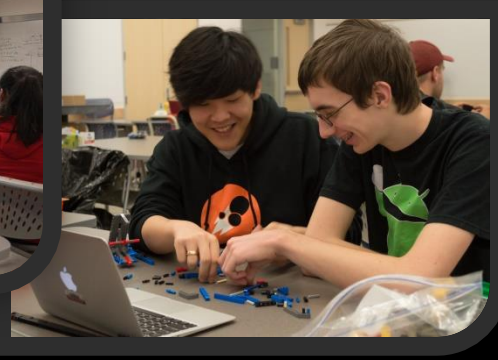

FLL Kit Building

We met at Sukup Hall to put together mission model kits for the Iowa FLL tournaments next month. We built 15 kits total, which is more than a fourth of all the kits that will be used in Iowa this year! Good luck to all the FLL teams at your competitions this year. We hope to see you at the state championship in January!

"New-Trinos" Meeting

Team Neutrino had a booth at the Ames High School Club Fest to invite students to our informational meeting. A week later, we told the new members about our team, gave them a demo of our Recycle Rush robot, and met the new members. We're excited to get to know all our "New-Trinos" this year!
