

Team Neutrino

Newsletter Week #2

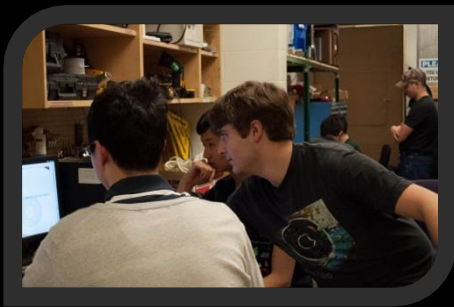

Programming

The programmers learned about classes and got to practice getting input and programming the joystick.

CADD

The CADD sub-team made tons of progress this week on the drive train! Hopefully it will be ready to send to Quality Manufacturing on Monday.

Mechanical

This week, the mechanical sub-team finished the tote chute and continued to work on the prototype for the adjustable side roller intake.

Iowa State FLL Championship

On Saturday, FLL'ers from across the state came to Ames to compete in the State Championship! Team Neutrino had an outreach booth and then presented with FRC Team 525 to about half the teams during judges' deliberations. Congratulations to Mrs. Dixon, head coach of the AMS FLL teams, for winning the Adult Coach Award this year!
