

Team Neutrino

Newsletter Week #6

Mechanical

We got the robot operational so we can drive, pick up totes, and stack. With small fixes we should be ready to go for bag and tag!

Chairman's

We submitted the executive summary and paper! Next week we will take interviews for the video and work on the presentation.

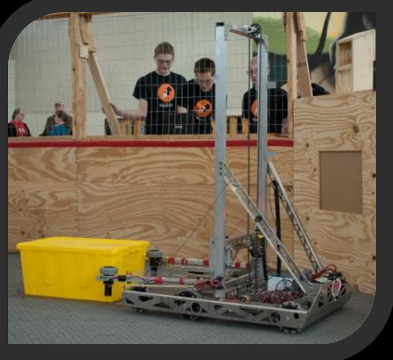

Driver Practice

Our drivers got experience driving/ stacking and using the robot. Our human players got the same experience and the drive team has a list of things to work on with the practice bot.

Cedar Falls Iowa FRC Scrimmage

The team went to Cedar Falls to attend the Iowa FRC scrimmage hosted by team 525. We learned how our robot behaves with the game and the pressure of competition. We were also able to determine weak points of the robot and create a list of things to modify.

QUALITY
MANUFACTURING

2015

Coming Next Week: Tuesday is bag day, so we'll have our robot sealed up until competition.
