

Team Neutrino

Newsletter Week #3

Mechanical

The mechanical team worked on and wired the 2014 robot and our new drive train. We got our 2016 drive train running successfully on Saturday!

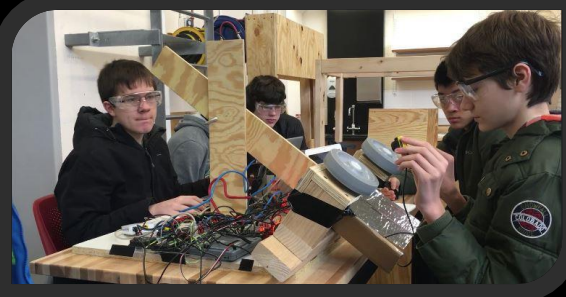

CADD

This week the CADD team finalized the manufacturable parts and sent them to quality. We also started work on a climber mechanism.

Programming

This week the programming group finished vision tracking and preliminary robot code. We also started coding robot autonomous modes.

Non-Technical

The non-technical sub-group worked on the Woodie Flowers submission and the Chairman's Essay. This week we finally got the Chairman's Essay under 10,000 characters!

Coming Next Week: We're going to submit the Chairman's Essay on Tuesday!!
