

Team Neutrino

Saint Louis Champs

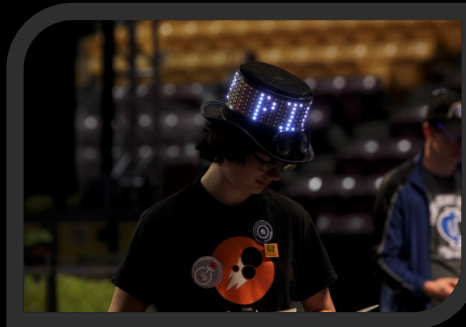

Qualification Matches

Our qualification matches at Champs went well. After a qualification record of 6 wins, 3 losses and 1 tie, we ranked 11th out of the 68 teams in the Darwin division.

Alliance selection

In the alliance selection, we were the 1st pick of the 8th seeded captain. We competed with 1506 Metal Muscle, 4391 BraveBots, and 3277 ProDigi in the Darwin division playoffs.

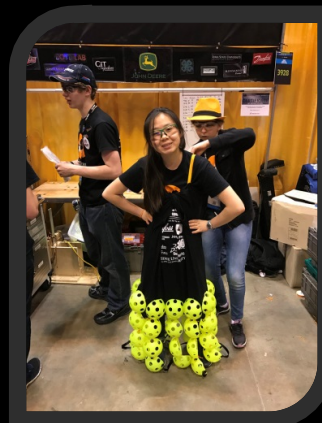

Playoffs

As we were on the 8th seeded alliance, we played the 1st seeded alliance. We were unable to beat the 1st alliance in either of our matches; however, we were really close to doing so in the second match.

Activities

Many members of our team were able to go to various workshops that taught about topics ranging from diversity in STEM to running a successful FRC team. We also had the opportunity to watch FLL teams and FTC teams. Some Neutrino students participated in a contest to make a costume out of fuel (a game element from this year).
