

Team Neutrino

Newsletter Issue #5

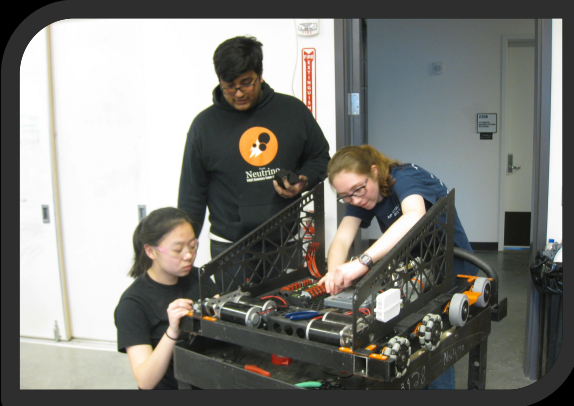

Women in Science Event

On Saturday, February 10, Neutrinos visited SCI to volunteer for the Girls in Science Festival, alongside other organizations from all over the state of Iowa. We showed kids Snap Circuits and LEGO Mindstorms robots and spread the message of FIRST.

Quality Parts Arrive

On Wednesday and Thursday our team was very excited to receive sheet metal parts from our sponsor Quality Manufacturing. Neutrinos painted parts and began robot assembly.

Robot Assembly

With sheet metal and machining parts done, there was a big effort to assemble both robot drivetrains, elevators, lifts and power cube intakes. The electrical team worked on mounting electronics and wiring both robots.

Submitting Chairman's

Members celebrated after submitting the 2018 Chairman's Essay and Executive Summary. The team will have the fun task of working on their presentation for the next few weeks!
