

Team Neutrino

May-June

Summer Camps

This summer, we've begun to integrate new members through our virtual training camps. From programming and CAD to graphics and branding, new members explored the team's opportunities. We also had a team fun night to showcase projects done during graphics camp.

Digital Conferences

Team Neutrino is continuing our engagement online. Our FLL Unconference is an opportunity for FLL coaches to learn from each other. We're also planning our presentation of the team's digital outreach strategies for the national FTC coaches conference this August.

Fundraising

Team Neutrino has been working on integrating NEWtrinos into the fundraising process, as well as starting several projects to keep our sponsors updated and engaged with the team's activities.

Buddy System

For the first time, this summer Team Neutrino has started a buddy system to help introduce and increase engagement between old and new members. Students are divided into different groups and get to meet bi weekly online to discuss different, fun topics!
