

# Team Neutrino

## July- August

### Recruiting New Students

During August, Team Neutrino mentors began interviewing students interested in joining Team Neutrino in the upcoming season. Students were able to choose between online and in-person, socially distanced interviews.

### FLL Unconference

In August, Team Neutrino hosted our second annual FLL Unconference. This virtual event provided FLL mentors and coaches an open dialogue to discuss and share ideas relating to all areas of FLL, from core values to judging practices.

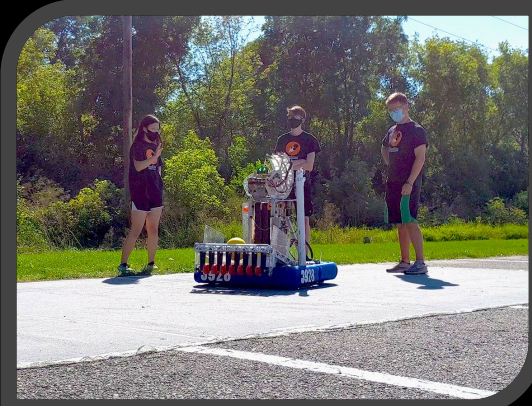

### FTC Coaches Conference

This August, Team Neutrino presented "Team Neutrino's Outreach Journey: 2011 to Quarantine" virtually to FIRST's National FTC Coaches Professional Development Conference. The panel assisted upcoming *FTC* teams in learning the importance of sustainable outreach and impact.

### Driving Robot at The Park

Team Neutrino hosted an outdoor, socially distanced meeting where students new to the team worked with existing members to learn how to drive the robot, how drive team functions, and to get hands-on experience.

**Coming Next Time:** Starting to mentor FLL teams for the 2020-2021 season!
