

# Team Neutrino

## March-April

### Stay-At-Home STEAM

Team Neutrino has been making fun instructional videos called Stay-at-Home STEAM for kids to stay engaged at home. These crafts and activities teach kids how to make things using household materials. Videos are being uploaded to [our Youtube Channel!](#)

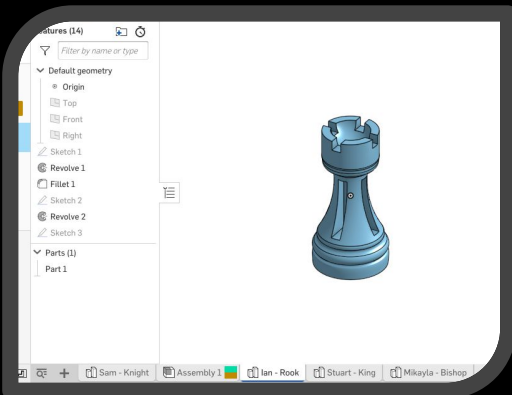

### Virtual Chairman's Exchange

Due to the suspension of the current FIRST season, we decided to host the Virtual Chairman's Exchange. This provided teams the opportunity to share about their team and receive constructive feedback. We had teams from Wisconsin and Turkey present at our exchange.

### Onshape Project

Team members are working on a project using Onshape, which is a CAD software. We are working in groups to make chess boards, and we are also participating in "Robots to the Rescue" which allows us to design a robot that will solve a real world problem of our choice!

### Dean's List

On March 31, Lauralee and Maab, our Dean's List nominees this year, were able to have a virtual interview with judges from the Iowa Regional. We are excited to announce that on April 29th Maab was named a 2020 Iowa Regional Dean's List finalist!
