

# TEAM NEUTRINO

## March 2021 Newsletter

### Haiti FLL Meet-And-Greet

Team Neutrino held a video conference with the Haiti FLL teams we have been supporting and Ames FLL team Speedy Turtles who has been raising funds for laptops to donate to the Haiti FLL teams. Each team demonstrated their robot and asked the other teams questions. It was great to meet the Haitian FLL kids!

### FLL Mentoring - Championships

On March 27th, Team Neutrino mentors met up with our 3 state-advancing Ames FLL teams to virtually compete in the Iowa FLL State Championships. These teams have been working very hard since August and were very excited to get to show off their projects and robots. Lucy, one of the team members, won the Grace Murray Hopper Award, a prestigious recognition of girls in FLL!

### FRC Award Interviews

This month, Team Neutrino interviewed for 4 award categories: Chairman's, Innovation Challenge, Game Design, and Infinite Recharge. Presenters remotely gave presentations to *FIRST* judges and answered in-depth questions about their work. Although advancement judging is still occurring, award teams are incredibly happy with our performance at these interviews.

### Neutrino Competition Reveal

Team Neutrino hosted a virtual Competition Reveal showcasing the various submitted challenges for the 2021 FRC Season. Each subteam gave a presentation that displayed the different challenges, and answered questions asked by the audience. It was a great way to showcase our work this season for the community.
