TEAM NEUTRINO

September-October 2021 Newsletter

NEWtrino Fun Night

Team Neutrino held a fun night on October 3rd for NEWtrinos still getting acquainted with the team. We organized this event to introduce our new members and associates to the team's culture beyond building robots. Members had lots of fun getting to know each other by competing in everything from soccer to board games.

EMCC - Practice Competition

This September we attended EMCC, a practice competition hosted by teams 3130, 2175, and 3883. We had a really great time working with and competing against other robotics teams for the first time in a very long year and a half. It was an amazing jumpstart to the year which gave all of our members a great competitive refresh.

Outreach Efforts

This month, Team Neutrino visited Cub Scout Pack 159 to promote some great Ames STEM opportunities, volunteered at the Science Center of Iowa's Mini Maker Faire with Team Photon 18050, and handed out STEM giveaways to kids at this year's Trunk or Treat at the North Grand Mall. It was great to connect with everyone!

Fundraiser Success

Since the past year has caused a drop in our expected income, members were inspired to try new fundraising approaches. Team Neutrino recently held a garage sale, where we engaged with our local community and raised \$1612.76! These funds will be used later for competitions and robot expenses. Thanks to everyone who helped us pull this off!
