

TEAM NEUTRINO

2022 Iowa Regional Newsletter

Back To In-Person Competitions

This past week, Team Neutrino attended the Iowa Regional. This was the team's first time competing at an official *FIRST* competition in over two years. After lots of work during build season, all team members were excited to finally show off our hard work, and upperclassmen made sure to guide the underclassmen at their first-ever official in-person competition.

Alliance Selection

Team Neutrino was selected as the first pick of the seventh seed alliance after a great performance during qualification matches. Alongside our alliance captains, Team 6217, and third alliance partners, Team 6424, we were able to advance to the semi-finals. Our alliance performed exceptionally and was able to put up a good fight against the third seed alliance. We were excited to cheer for other teams as they advanced further.

Chairman's Exchange

Team Neutrino hosted a Chairman's Exchange at the Iowa Regional. A total of 6 teams attended, and three other teams practiced presenting alongside Team Neutrino. It was great to network with teams and to provide others the opportunity to share about their team and receive constructive feedback.

Engineering Inspiration & Dean's List

At the Iowa Regional, Team Neutrino won the Engineering Inspiration Award (sponsored by NASA), a prestigious award given to the team that advances appreciation for engineering in their community. By winning this award, the team is now qualified to attend the World Championship in Houston. Moreover, Leslie was awarded the Dean's List Finalist Award and is now competing for the Championship Dean's List Award!
