

# TEAM NEUTRINO

## May-June 2022 Newsletter

### CelebrAsian Festival

During Asian American Pacific Islander month, a few of our members got the outreach opportunity to showcase our robot and achievements. This event was hosted in Des Moines by the Iowa Asian Alliance. While there, team members helped spread awareness about STEM and its importance in the community. This was a rewarding experience that of our members enjoyed.

### End of the Year Party

At the end of the year party, we celebrated the Rapid React season by playing games and spending time with each other. We also said goodbye to our 13 graduating seniors. We thanked them for all the splendid seasons they have spent with us. We are heartbroken to see them go, but we know a great future awaits for each and every one of them.

### CIT Sponsor Visit

On June 10th, Team Neutrino held our first sponsor visit of the summer for CIT Transportation, sharing and showcasing what Team Neutrino is and does. This was great training for our NEWtrino students. CIT provides Team Neutrino transportation to competitions and continues to support us. Thank you CIT Transportation for sponsoring us since our founding!

### Summer Training Camps

Over the course of the summer, Team Neutrino has been offering 11 training camps for incoming students that want to be on the team. Each camp is offered by a subteam where they have live examples, hands-on projects, and training that are led by student subteam managers. This year camps are offered in many areas such as outreach, graphics, CAD, programming, manufacturing and prototyping.
