

TEAM NEUTRINO

July-August 2022 Newsletter

Full STEAM Ahead

Throughout this past summer, Team Neutrino produced a TV series in collaboration with the Ames Public Library. Full STEAM Ahead is an original children's show that was put together entirely by students. The show consists of 7 episodes. Each takes place at a fun location in Story County where viewers can learn about STEAM. **Watch the show on our YouTube with new episodes premiering each week!**

Enrich, Empower, Excel

Over the course of this summer, Team Neutrino taught 5 weeks of STEM activities at Enrich, Empower, and Excel. Each week, the students on the team gave kids themed activities relating to STEM, such as motion or chemistry. During these classes, kids were given challenges to help develop their problem solving skills and cultivate their interest in STEM. We loved getting to see their involvement and excitement about STEM.

Sponsor Visits

Recently, Team Neutrino has had multiple opportunities to present our accomplishments to our sponsors. During these visits, the team demonstrated the robot and gave a short presentation about the team. Sponsors are a vital part of Team Neutrino, as we are always looking for new ones and reaching out the ones we already have. It was great connecting to our sponsors through these visits. **Thank you so much to our sponsors for supporting us!**

Iowa State Fair

On August 21st, Team Neutrino exhibited in the 4-H building and as part of the Iowa Governor's STEM Day at the Iowa State Fair, where we showcased our robot along with other 4-H teams. 4-H is a nonprofit organization that engages youth into STEM activities, inspiring future innovators. Sharing with the community who we are and what we do was a great experience for both our team and our audience. We hope to attend again next year!
