

TEAM NEUTRINO

September- October 2022 Newsletter

Des Moines Mini Maker Faire

In early September, Team Neutrino volunteered at the annual Des Moines Mini Maker Faire along with FTC Team Photon #18050. In addition to teaching our community about circuits, sharing our team history, and demonstrating our robot, we enjoyed working with event coordinators and other volunteers at different STEM stations around the building.

2023 Champs Pre-Qualification

Team Neutrino was able to pre-qualify for 2023 FRC Championships by winning the Engineering Inspiration Award at the FIRST Championships last year. The Engineering Inspiration Award celebrates outstanding success in advancing respect and appreciation for engineering within a team's school or organization and community. We are excited for an amazing season ahead. Go team!!

FLL Mentoring

This past fall, Team Neutrino has been mentoring FIRST LEGO League teams at Ames Middle School and Fellows Elementary School and helping prepare them for their regional competitions. Our mentors guide students through building attachments and programming a robot, as well as putting together a presentation to showcase their innovative projects.

Cow Town ThrowDown

Team Neutrino went to Cow Town ThrowDown, an off-season competition in Lee's Summit, MO. This was a great chance for our team to interact with other teams and for new members to gain competition experience. We ranked 11th going into alliance selection and became the captain for the 8th alliance. We made it to the quarterfinals and had fun watching the rest of the matches.
