

TEAM NEUTRINO

Iowa Regional Newsletter 2026

Robot Wins!

After 8 qualification matches, Team Neutrino was ranked 9th going into alliance selection! We were selected as the 1st pick on the 2nd alliance by Team 4646 and also worked alongside 2nd pick 5557. Our alliance competed together to make it to finals, and then won the regional after a close tie-breaker!

Impact Exchange

At the Iowa Regional, Team Neutrino continued the tradition of hosting a yearly Impact Award Exchange. There, we invited 30 people from 10 other teams to share their presentations and exchange advice and feedback to aid each other in the Impact submission process in the future!

Woodie Flowers Finalist

Recognized for her outstanding commitment to FIRST and contributions to Team Neutrino, our lead team mentor Dagney was awarded the Woodie Flowers Finalist Award! As a finalist, she will represent the team and compete for this award at the FIRST Championship later this month in Houston.

Engineering Inspiration Award

In recognition of the team's outstanding STEM outreach, Team Neutrino was awarded the Engineering Inspiration award, qualifying them for the FIRST Championship in Houston! Teams members in the pit represented the team well and communicated the team's outreach efforts and statistics to judges, earning us the award.
