

# TEAM NEUTRINO

## Bluff Country Regional 2026

### Robot Performance

Our team had an amazing first regional! Following qualification matches, we became Alliance 4 Captain and made it all the way to finals with Team #695 Bison Robotics and Team #7858 Warrior Robotics. Ultimately, we placed 2nd as regional finalists and became one of only 3 teams to **qualify for the FIRST Championship** in Houston, Texas this April!

### Spreading Our Impact

The awards subteam hosted yet another successful Impact Exchange! This regional, we co-hosted our Impact Exchange with another team, #7531 Servos Strike Back. Impact presenters from teams across the region got together to practice presenting and share stories of incredible outreach with each other.

### Team Sustainability Award

Thanks to the hard work from our Pit Reps, Team Neutrino came home with the Team Sustainability Award! This award honors teams who make a lasting impact on both their members and their communities via sustainable initiatives and passage of knowledge. Our team is excited to receive this award again and make it our due diligence to exemplify its values!

### Champs Ticket Punched!

Huge shoutout to our incredible drive team members and scouting subteam this weekend! Match after match of both quantitative and qualitative scouting led to some great decision-making during alliance section, and an outstanding performance from our drive team brought home another silver medal and a ticket to Champs!
